Safety for Managers

Course Overview

Safety for Managers gives learners an understanding of how to manage health and safety issues in the workplace.

It covers the moral and legal responsibilities of Managers and the techniques for identifying and controlling risk in the workplace. By the end of the session, learners will be able to recognise hazards in their own work environment and manage them appropriately.

Who is the course for?

Those in a line management or supervisory role who need to understand their health and safety responsibilities.

Learning outcomes

- Appreciate the importance of managing health and safety and the consequences of failing to do so.
- Understand how accidents and incidents occur and how to prevent them.
- Demonstrate the ability to identify, evaluate and reduce risk.
- Understand the legal requirements for managing health and safety under the Health and Safety at Work Act.
- Recognise the key elements of a health and safety management system and how to implement them.
- Demonstrate the ability to measure and improve health and safety performance.

Course Key Facts

Safety for Managers

Company benefits

- Workplace absence costs the UK economy £18 billion in lost productivity. Good health and safety practices protect employees from injury and sickness, improving productivity and reducing costs. This course will enable your Manager's to integrate a positive safety culture throughout your company and manage health and safety in balance with the other business objectives.
- New sentencing guidelines released in 2016 has resulted in an increase in prosecutions and fines of over £1 million. Courts can impose fines and imprisonment to both organisations and individuals who have been deemed to neglect their health and safety duties. Safety for Managers will ensure your Managers understand their legal responsibilities, protecting your company and themselves from prosecution.
