

Leading with Environmental Sustainability

Syllabus Guide

Astutis.

Leading with Environmental Sustainability

Leading with Environmental Sustainability is a powerful half-day session that will change the way you do business. This session challenges leaders in organisations, senior executives, board members and investors; to formulate a strategic understanding of the risks and opportunities presented by a changing environment on their ability to do business. The session also helps senior executives to understand their personal obligations to ensure the business remains compliant. The outcome of the session is a complete re-engineering of your strategic objectives.

Who Is It For?

This session has been developed for the decision-makers of every organisation, regardless of sector specialism or previous experience of environmental issues.

Learning Outcomes

This session goes through the following topics:

- What does Environmental Sustainability mean for the organisation?
- Is the organisation's existing strategy fit-for-purpose?
- Which organisations are leading with Environmental Sustainability and why?
- Understand the implications of complying with environmental law
- What would a new strategy look like?

Learning Hours

- The IEMA Leading with Environmental Sustainability course will take 4.5 hours to complete

Course Assessment

- There is no examination in this course, instead an end of course review is conducted.
